

REMARKS

In the above-identified Office Action the Examiner has requested corrected drawings and applicant hereby encloses same.

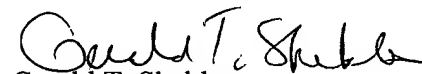

The specification has been objected to as failing to provide a proper antecedent basis for all of the limitations in claim 19. Applicant has amended claim 19 to correct this matter and as amended the specification now provides proper antecedent basis for all of its limitations.

Claims 8 and 9 have been objected to because of certain noted informalities. These same formalities have been corrected with the exception of objection (d) wherein claim 19, line 12 does not have the words "received demodulated" and as such could not be corrected.

Applicant notes that claims 1-11, 15-19 and 21 have been allowed; accordingly, with the above amendments, the application should be allowable and Applicant earnestly solicits an early notice of same. Should the Examiner be of the opinion that a telephone conference would expedite prosecution of the subject application, he is respectfully requested to call the undersigned at the below-listed number.

Respectfully submitted,
